Working Agile

Aimed at:
Everyone who is on a way to agile and self-organized work and would like to know how this works.

Format:
"Working Agile" is a qualification format that promotes dialogue and collaboration, aimed at everyone looking to align their actions with agile principles. At its core, it is a workshop that can be supplemented by subsequent peer work or coaching if required. More than just talking about agile methods, the whole format is agile. Participants will try different agile ideas and methods while reflecting their own experience and attitude. Personal experience is combined with theoretical approaches and real-life examples in order to develop individual and practical concepts for everyday life. Our Specials? Fun, experimentation and experience!

Workshop Goals:
Participants who attended this workshop ...

- know the development of the world of work 1.0-4.0
- know the central approaches that hide behind the buzzword "agility"
- identify the necessary future competencies of an organisation or their own area of work
- describe the requirements for "being agile" and the associated change to self-organization
- are familiar with the central methods and formats of "working agile"
- know ways and methods for agile alignment of themselves and their teams
