Agile Leadership

Aimed at:
Those who lead with an interest in working agile.

Format:
"Agile Leadership" is a qualification format that promotes dialogue and collaboration, aimed at managers who want to align their actions along agile principles. At its core, it is a workshop that can be supplemented by subsequent peer work or coaching if required. Not only do we talk about agile methods, the whole format is agile. Participants will try different agile ideas and methods while reflecting their experience and attitude. Personal experience is combined with theoretical approaches and practical examples in order to develop individual and practical concepts for everyday life. Our Specials? Fun, experimentation and experience!

Workshop Goals:
Participants who attend this workshop will ...

- know the development of the world of work 1.0-4.0
- know the central approaches and formats that hide behind the buzzword "agility"
- identify the necessary future competencies of an organisation or their own area of work
- describe the requirements of an agile leader and the associated change of role
- are familiar with the central methods and formats of "working agile"
- know ways and methods for agile alignment of themselves, their employees and their division

Content:
- Experience agility
- On the road to work 1.0-4.0: Welcome to the new world of work
- Understanding agility: Buzzword Bingo
- Differences between "agile leadership" and leadership as we know it
- The role of the agile leader today and the transformation tomorrow
- Empowering people, teams and the entire organization with "agile leadership"
- Let's go: Insights into the self and agile methods
- Practical support and reflection
